## PROFESSIONAL SUMMARY

Early-career technical professional with university studies in Software Engineering and hands-on experience in IT troubleshooting, programming, documentation, software testing and customer service. Experienced with Windows and Linux support, C, Java, Python, HTML/CSS, JavaScript, Git and team-based project work. Strong problem-solving, organization and attention to detail.

## TECHNICAL SKILLS

**Programming:** C, Java, Python, HTML, CSS, JavaScript

**Systems & Support:** Windows, Linux, software installation, drivers, Wi-Fi/router troubleshooting, BIOS/UEFI, backup/recovery, peripherals

**Tools:** Git, GitHub, Visual Studio Code, Eclipse, Trello, Slack

**Methods:** Agile methodologies, debugging, software testing, documentation, quality assurance

## TECHNICAL EXPERIENCE & PROJECTS

### Independent Technical Support

Ongoing

- Troubleshoot Windows and Linux systems, software errors, slow performance, account/email access, Wi-Fi, drivers, startup/boot issues and peripherals.
- Install/reinstall operating systems, drivers and software; create bootable recovery media; back up and restore user files; configure routers and Bluetooth/USB devices.
- Diagnose issues using Task Manager, BIOS/UEFI, boot-manager checks and system diagnostics; write and execute test cases for C programs.

### Adaptive Math Learning Website | Team Project

2025

- Developed page layouts, menu and navigation components using JavaScript; used Git/GitHub for branches, commits, pushes and merges in a collaborative workflow.

### Statistics Canada Data Processing & Analysis

2024

- Built a Python program to search and process Statistics Canada datasets, graph selected data and support data-based conclusions.

### Operating Systems Scheduling Simulator

2023

- Developed a C-based scheduling simulator using round-robin and first-come, first-served algorithms, reporting execution order and wait times from input process data.

## WORK EXPERIENCE

### Four Points by Sheraton | Banquet Server

May–Aug 2024

- Worked in 5–10 person teams to set up, serve and reset events for 20–100 guests while responding to dietary requests and changing event needs.
- Communicated guest requirements accurately to kitchen staff and management in a fast-paced service environment.

### Tecsar Engineering Inc. | Office Assistant

July 2024

- Organized project documents into a structured, accessible filing system in a professional engineering office.

## EDUCATION

University of Guelph | Software Engineering studies, Bachelor of Computing program

2023–2026

## AWARDS & ADDITIONAL INFORMATION

3rd Place, University of Windsor Hackathon (2022) | Smart Serve | Ontario G Driver's Licence | Full-time availability
